OBJECTIVE

Full Stack Developer with 3 years of experience building scalable web applications in fast-paced environments. Proficient in the MEAN/MERN stack with a strong focus on Angular development.

EDUCATION

Bachelors of Engineering in mechanical, Visvesvaraya Technological University, Belagavi   2018-2021.

SKILLS

Front-end development: HTML, CSS, JavaScript, Typescript, Angular, React.js, RxJs, Bootstrap, Material UI

Back-end development: Nodejs, Express, mongoose, Authentication

Database: Mongo DB, PL/SQL

Others: Git, NPM, Webapck chrome developer tools

Soft Skills: problem-solving, analytical thinking, technical aptitude, adaptability, communication and teamwork.

EXPERIENCE

Front-end Developer | Tata Consultancy Services   Feb 2022 – Present

 Responsibilities:

- Designed, developed, and optimized a telecom operations platform, enhancing network visibility, improving operational efficiency, and streamlining incident response processes for network engineers and technicians.
- Developed and implemented reusable Angular components**,** reducing code duplication by 50%, resulting in increased maintainability and faster development cycles.
- Improved application performance by 20% for large datasets by utilizing Web Workers and virtual scrolling techniques**.**
- Led the upgrade to Angular 17**,** incorporating lazy loading and reusable components to enhance project structure and performance.
- Utilized Angular, Typescript, HTML, CSS, JavaScript**,** and Plotly.js for building interactive charts and map functionalities.
- Employed agile methodologies (Scrum, JILE**)** to ensure effective project management and iterative development.

PROJECTS

Real-time Chat Application:

- Developed a real-time chat application using Angular, Express, PL/SQL, and Socket.IO**,** featuring one-to-one chats, group chats, and media sharing for images, videos, and files, ensuring a seamless and interactive user experience.

Music Streaming App: [Link]

- Developed a music streaming platform with React**,** Tailwind CSS**,** Recoil**,** Node.js**,** Express**,** and MongoDB**,** featuring user authentication**,** search**,** music playback**,** playlist creation (private & public)**,** and collaboration features**.**

Recipe Management Application: [Link]

- Developed a Recipe Management Application with features such as user authentication, infinite scrolling, recipe discovery, adding recipes to favorites, viewing recently accessed recipes, and saving personal recipes**,** providing a user-friendly and engaging experience.

EXTRA-CURRICULAR ACTIVITIES

- **Mentorship:** Provided technical guidance to junior team members and mentored new hires, fostering a positive and supportive learning environment.
- **Full-Stack Development Course:** Successfully completed a comprehensive full-stack development course, demonstrating a strong foundation in web development technologies and best practices.
